Will Middle Class Actually Benefit?

THE WAY I SEE IT

By Michael Collins Piper

Forget, if you can, the widespread belief that Barack Obama is a half-black, Kenyan- born Marxist Muslim socialist (secretly sponsored by the Soviet KGB) who has been accused of adultery, sodomy, smoking crack and marijuana, stealing elections, forgery and a variety of other misdeeds. All told, based on that summary of Obama — as put forth by some respected writers associated with AMERICAN FREE PRESS — the guy sitting in the White House (apparently un-constitutionally, if his critics are correct) sounds, in many respects, like many modern-day American politicians (minus the Islamic twist).

That stated for the record — and be assured that had the above not been mentioned that AFP would have received a lot of angry letters asking why it wasn't — let's take a look at the rhetoric found in Obama's recent State of the Union address.

And, by the way, if you didn't hear Obama in the original English, you can probably find at least the Spanish-language response put forth by the GOP's current golden boy, Sen. Marco Rubio (R-Fla.) — a sure signal, if anything, that the "old America" we all miss is being cast to the wayside by the "new" Republican Party.

Those who still continue to think (or pray) the GOP is going to come to the rescue and break up the trend toward multiracialism and multiculturalism — and that has been used as an excuse for many to continue to support the Republican Party as opposed to third-party alternatives — had better face reality.

So — all of that having been said — whether you like Obama or not (and most people who read AMERICAN FREE PRESS do not, and usually for very sound and solid reasons), the truth is that the underlying foundation of his State of the Union address (at least his rhetorical tone, anyway) incorporated a theme on economic issues — repeat: economic issues — that most traditional American populists would find hard to challenge.

Now don't get us wrong: It was bad for Obama to trumpet gun control. AFP has always opposed gun control and always will. Count on that. But we're not talking here about gun control — and yes, it is an important issue.

Instead, right now, we're talking about the overall message that Obama put forth: The idea that the middle class (and, unfortunately, it seems to be shrinking) needs a break.

As hard as it is for many to think, sometimes Obama says the right things (even if he doesn't mean them). So let's give him a thumbs up for at least pretending to think "right" about some issues, since that might actually convince some of his followers to think like American patriots do — if only by accident.
